Product Description

Husqvarna 564 XP® Mark II Chainsaw - 28"

The Husqvarna 564 XP® is a professional-grade, fuel-injected chainsaw built for brutal workloads, fast cuts, and full-day reliability.

If you run big acreage, clear timber, or need a no-nonsense saw that won't bog down when life gets heavy, the Husqvarna 564 XP® is designed for you. This is a saw for folks who push hard, think ahead, and don't have time for excuses. With instant-response EFI power and Husqvarna's signature balance and handling, it's built to work as long as you do — sunrise to sundown.

This isn't an entry-level machine. This is a professional's tool—ideal for landowners with serious timber to manage, firewood cutters who stack high every winter, and crews who depend on fast starts, quick throttle response, and all-weather consistency. Rain, heat, cold morning start-ups... the 564 XP® doesn't care. You pull, it roars.

It's one of Husqvarna's most advanced saws, tuned for torque, engineered for speed, and made to outlast whatever you throw its way.
